## The Use of Head of The Household to The Social Networking Site (Face Book) and Its Relationship to Doing Different Roles

Samah Abdel Fattah Abdel Gawad Ahmed

Home management and specialty institutions, home economics department,  
Faculty of Specific Education, University of Zagazig

### ABSTRACT

There is no doubt that this era the era of the information revolution, technological, and D ropes link between people, and the abolition of the border and near theof spaces, and easy deployment of science and cultural exchange, and became a necessary thing for a large number of us so it was a goal of the study and mainly identify the nature of the relationship between the use of head of the household to the social networking site (Face book) and its roles different and some variables level socio-economic families, and selected a random sample of 400 heads of household and levels of social, economic and educational different, was applied to the questionnaire they component of (Form public statements, the use of heads of household questionnaire to the social networking site (Face book), the roles of heads of household questionnaire The results showed that there is a statistically significant difference at the level of (0.05) between the degree of response to female heads of households of rural and urban women in both the use of the social networking site (Face book) and do the roles of different depending on the variable place of residence "- for heads of households urban, and there is a statistically significant difference at the level of (0.05) between the degree of response to female heads of households in both the use of the social networking site (Face book) and do the roles of different depending on variable working head of the household (work, do not work) "- in favor of

female heads of households workers, and study showed that there is a statistically significant difference at the level of (0.05) between the degree of response to female heads of households in both the use of the social networking site (Face book) and do the roles of different depending on the variable size of the family- in favor of small-scale, and there is a statistically significant difference at the level of (0.05) between the degree of response to female heads of households in both the use of the social networking site (Face book) and do the roles of different depending on age- for heads of household young, and there were statistically significant differences at the level (0.05) between the degree of response to female-headed households in the use of social networking site (Face book) and do the roles of different depending on the variable level education - in favor of the educational level high, and there were statistically significant differences at the level (0.05) between the degree of response to female-headed households in the use of social networking site (Face book) and do the roles of different depending on the variable family income- for the benefit of the high level of income. The study has proved the existence of a positive correlation between the use of head of the household to the social networking site (Face book) and its relationship to doing different roles

**Key words: The Social net working Site(Face Book) – different roles (a mother, a wife, a teacher, house wife family).**
